- Toastmasters

TOBY CRUST

PROFILE

I really enjoy building impactful, useful web applications. With over two years of full-stack experience, I've specialised in React and TypeScript, working on SaaS products in fast-paced startup environments. I get immense satisfaction on solving tough problems, learning fast, and owning features from concept to deployment—there's nothing more satisfying than seeing something you built come to life.

WORK EXPERIENCE

- Fabra - Software Engineer - Sydney** Oct 2024 - Oct 2025
 - Contributed to the development of Fabra's main SaaS application using React and TypeScript.
 - A Senior developer left the company and I was asked to step in and take ownership of his role of setting up the share design permissions and email validation for both front and backend.
 - Enhanced team productivity by developing internal system tools that streamlined workflows and improved backend operations.
- Bardon Design - Junior software Engineer - Bangkok** Feb - Oct 2024
 - Collaborated with Louis Vuitton team to develop a gamified e-commerce platform, increasing user engagement through interactive shopping experiences.
 - Made an Interactive AR furniture selection application.
- Software Internships - Auckland** University summer holidays
 - Created an AR Rube Goldberg machine level inside of their GeoArGames
 - Created a 2D arcade-style game embedded into Yuri&Niels website
